

log(EF cut-off) as a function of generation

Posterior estimate for T mean occupancy 0-19 as a function of generation

Posterior estimate for T mean occupancy 20-24 as a function of generation

Posterior estimate for T mean occupancy 25-29 as a function of generation

Posterior estimate for T mean occupancy 30-34 as a function of generation

Posterior estimate for T mean occupancy 35-39 as a function of generation

Posterior estimate for T mean occupancy 40-44 as a function of generation

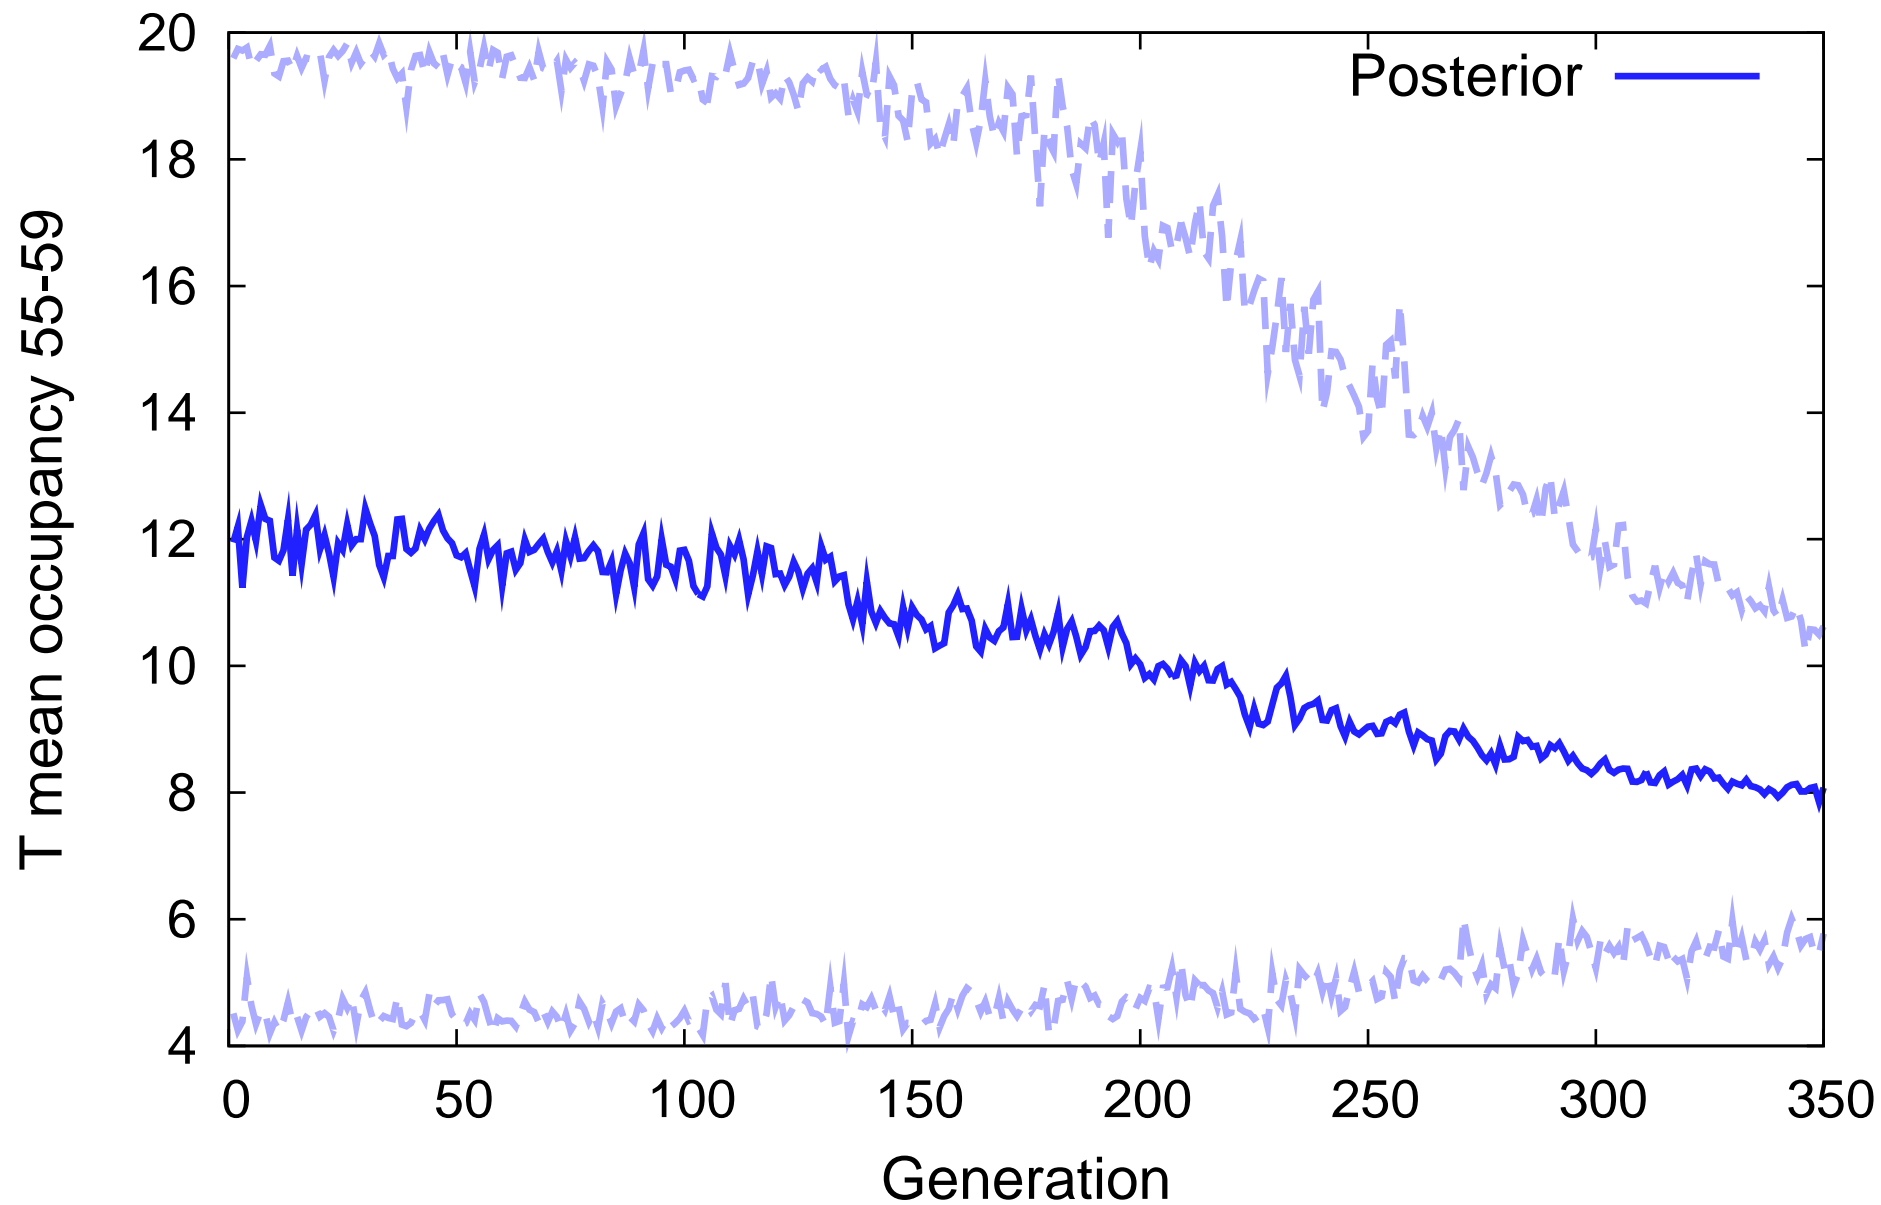

Posterior estimate for T mean occupancy 45-49 as a function of generation

Posterior estimate for T mean occupancy 50-54 as a function of generation

Posterior estimate for T mean occupancy 55-59 as a function of generation

Posterior estimate for T mean occupancy 60-64 as a function of generation

Posterior estimate for T mean occupancy 65-69 as a function of generation

Posterior estimate for T mean occupancy 70-74 as a function of generation

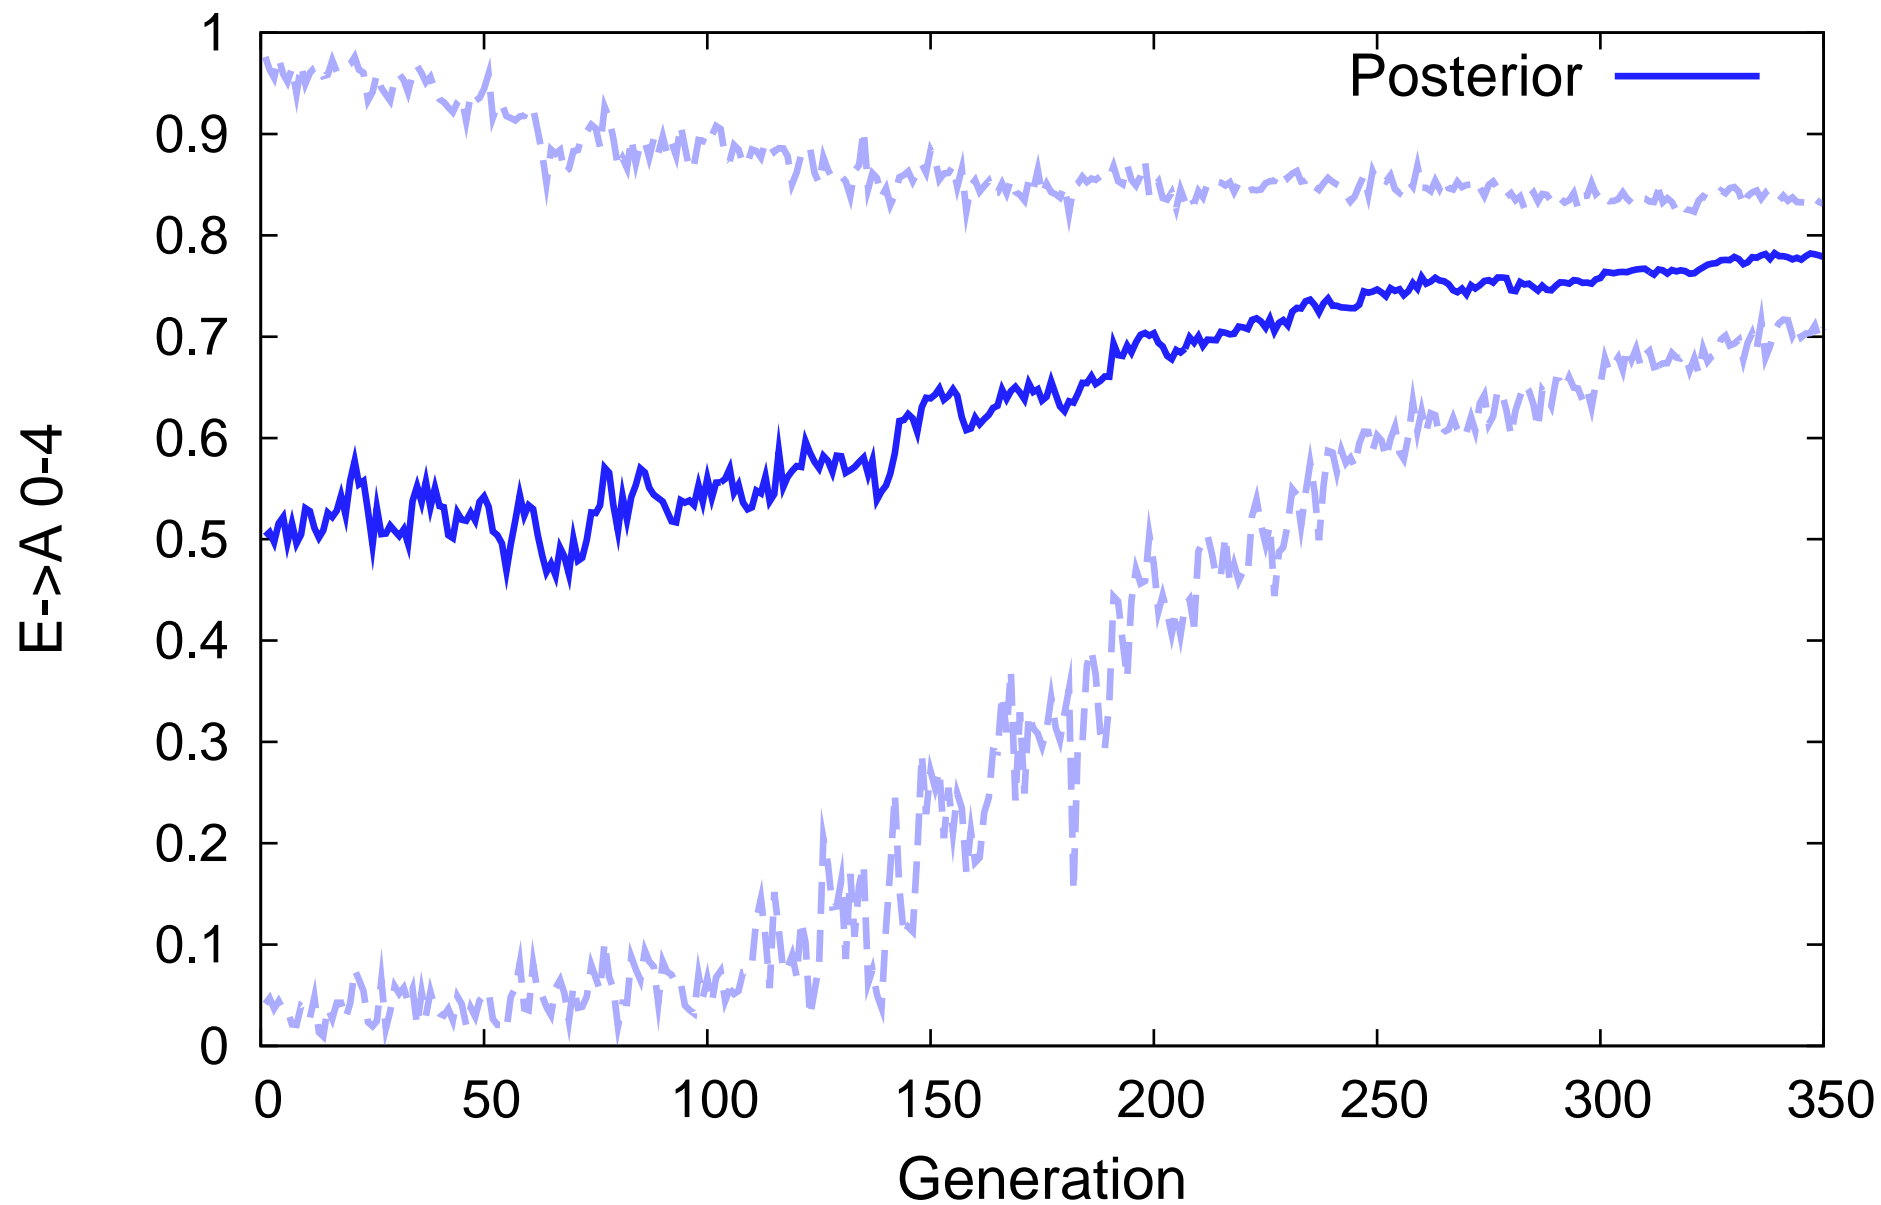

Posterior estimate for T mean occupancy 75-79 as a function of generation

Posterior estimate for T mean occupancy 80+ as a function of generation

Posterior estimate for E->A 0-4 as a function of generation

Posterior estimate for E->A 5-9 as a function of generation

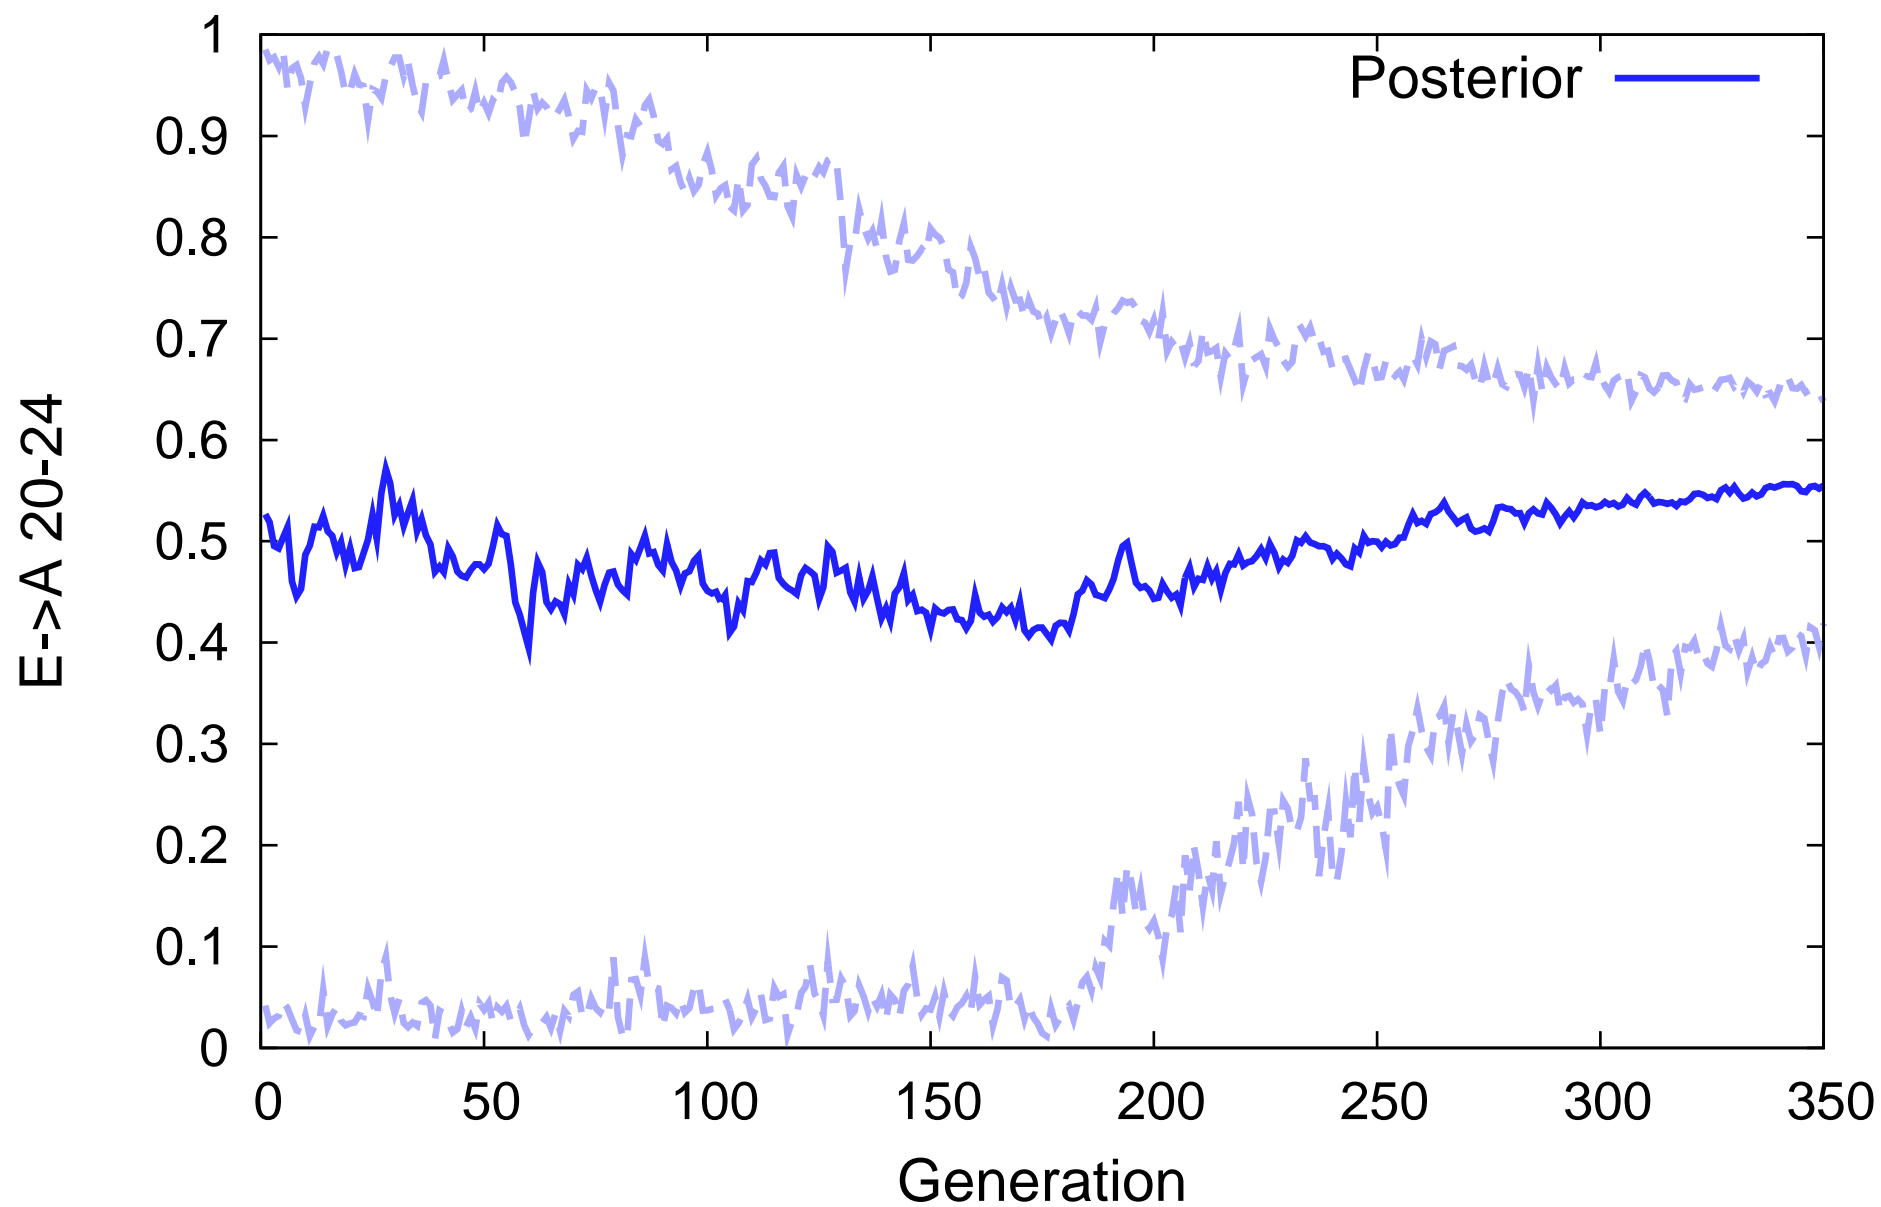

Posterior estimate for E->A 10-14 as a function of generation

Posterior estimate for E->A 15-19 as a function of generation

Posterior estimate for E->A 20-24 as a function of generation

Posterior estimate for E->A 25-29 as a function of generation

Posterior estimate for E->A 30-34 as a function of generation

Posterior estimate for E->A 35-39 as a function of generation

Posterior estimate for E->A 40-44 as a function of generation

Posterior estimate for E->A 45-49 as a function of generation

Posterior estimate for E->A 50-54 as a function of generation

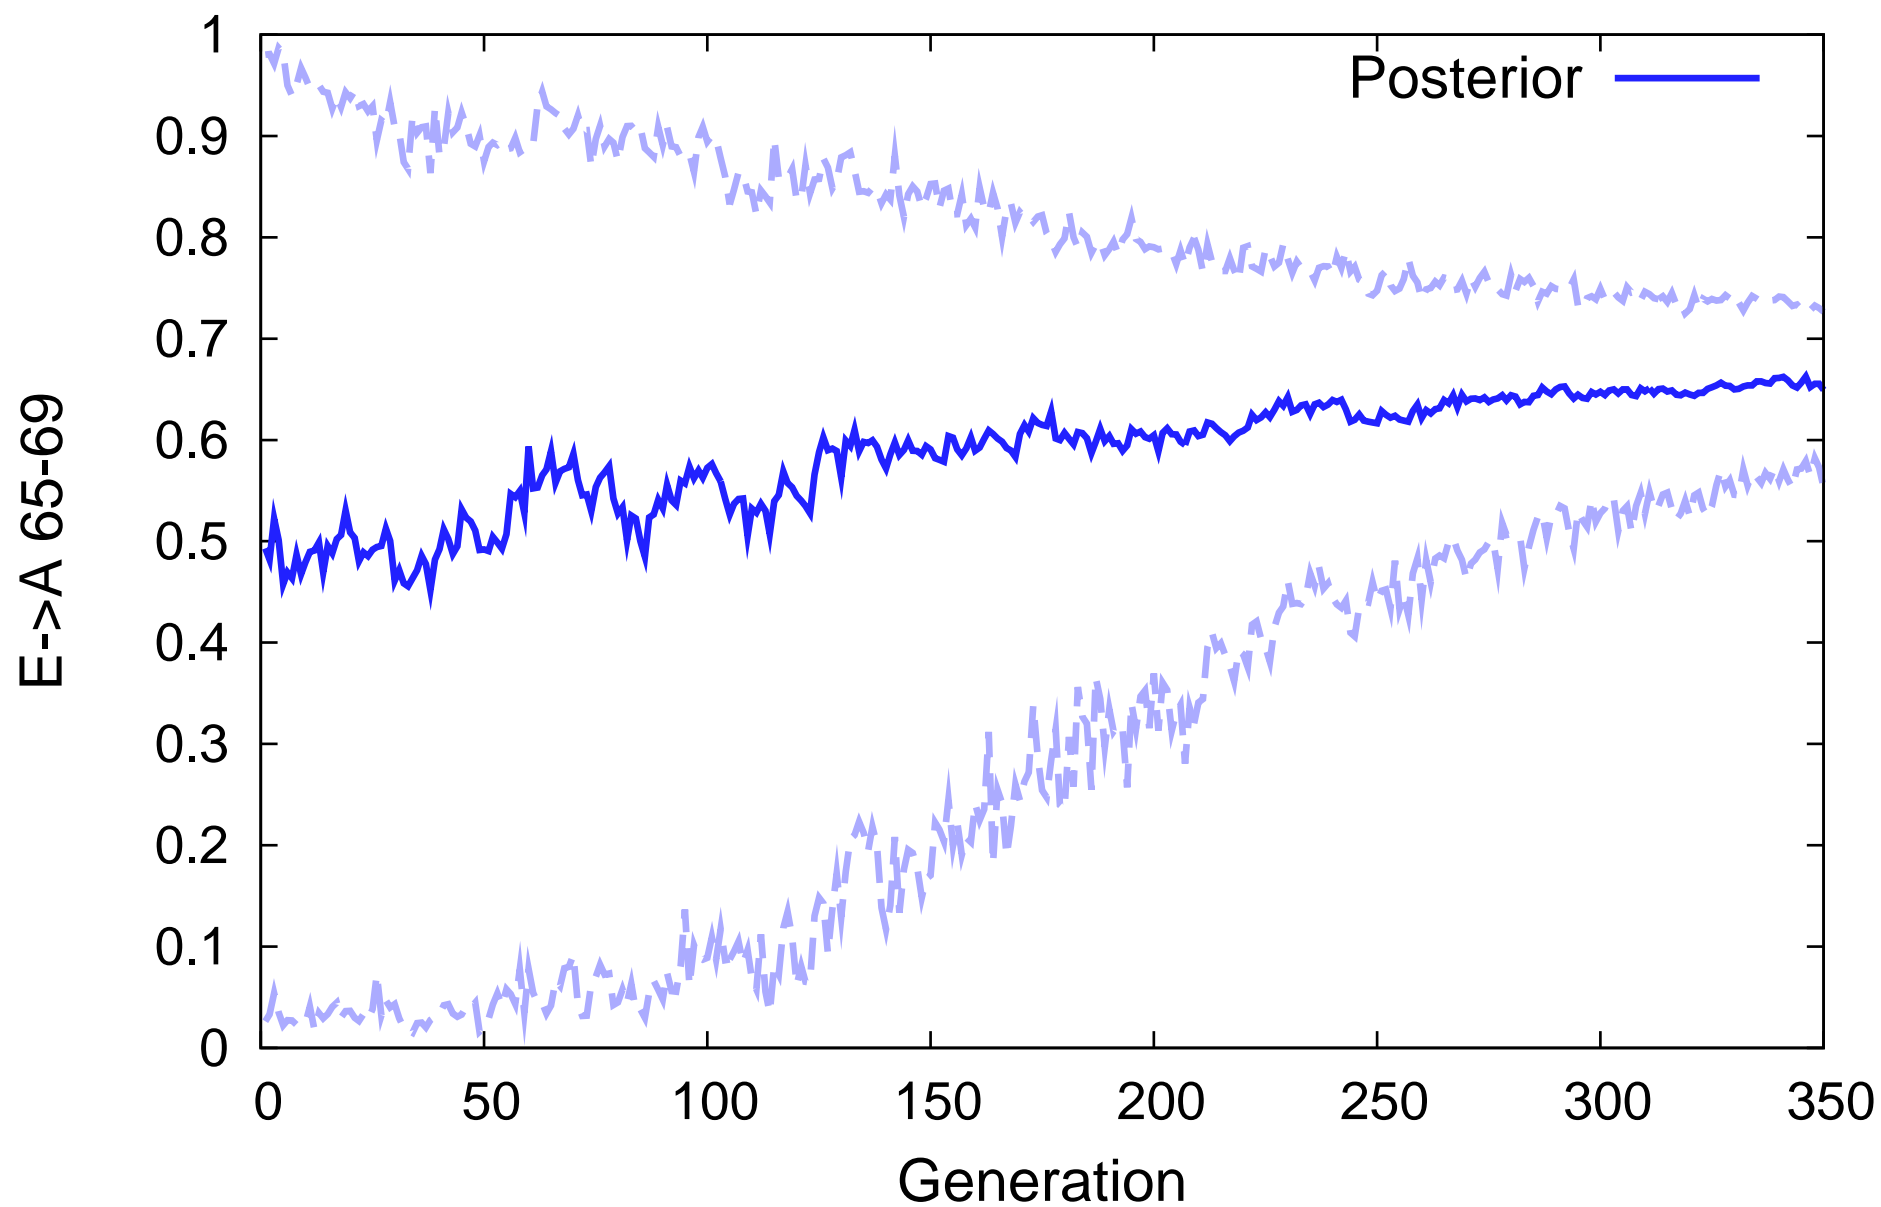

Posterior estimate for E->A 55-59 as a function of generation

Posterior estimate for E->A 60-64 as a function of generation

Posterior estimate for E->A 65-69 as a function of generation

Posterior estimate for E->A 70-74 as a function of generation

Posterior estimate for E->A 75-79 as a function of generation

Posterior estimate for E->A 80+ as a function of generation

Posterior estimate for E->I 0-4 as a function of generation

Posterior estimate for E->I 5-9 as a function of generation

Posterior estimate for E->I 10-14 as a function of generation

Posterior estimate for E->I 15-19 as a function of generation

Posterior estimate for E->I 20-24 as a function of generation

Posterior estimate for E->I 25-29 as a function of generation

Posterior estimate for E->I 30-34 as a function of generation

Posterior estimate for E->I 35-39 as a function of generation

Posterior estimate for E->I 40-44 as a function of generation

Posterior estimate for E->I 45-49 as a function of generation

Posterior estimate for E->I 50-54 as a function of generation

Posterior estimate for E->I 55-59 as a function of generation

Posterior estimate for E->I 60-64 as a function of generation

Posterior estimate for E->I 65-69 as a function of generation

Posterior estimate for E->I 70-74 as a function of generation

Posterior estimate for E->I 75-79 as a function of generation

Posterior estimate for E->I 80+ as a function of generation

Posterior estimate for I->T 0-4 as a function of generation

Posterior estimate for I->T 5-9 as a function of generation

Posterior estimate for I->T 10-14 as a function of generation

Posterior estimate for I->T 15-19 as a function of generation

Posterior estimate for I->T 20-24 as a function of generation

Posterior estimate for I->T 25-29 as a function of generation

Posterior estimate for I->T 30-34 as a function of generation

Posterior estimate for I->T 35-39 as a function of generation

Posterior estimate for I->T 40-44 as a function of generation

Posterior estimate for I->T 45-49 as a function of generation

Posterior estimate for I->T 50-54 as a function of generation

Posterior estimate for I->T 55-59 as a function of generation

Posterior estimate for I->T 60-64 as a function of generation

Posterior estimate for I->T 65-69 as a function of generation

Posterior estimate for I->T 70-74 as a function of generation

Posterior estimate for I->T 75-79 as a function of generation

Posterior estimate for I->T 80+ as a function of generation

Posterior estimate for I->C 0-4 as a function of generation

Posterior estimate for I->C 5-9 as a function of generation

Posterior estimate for I->C 10-14 as a function of generation

Posterior estimate for I->C 15-19 as a function of generation

Posterior estimate for I->C 20-24 as a function of generation

Posterior estimate for I->C 25-29 as a function of generation

Posterior estimate for I->C 30-34 as a function of generation

Posterior estimate for I->C 35-39 as a function of generation

Posterior estimate for I->C 40-44 as a function of generation

Posterior estimate for I->C 45-49 as a function of generation

Posterior estimate for I->C 50-54 as a function of generation

Posterior estimate for I->C 55-59 as a function of generation

Posterior estimate for I->C 60-64 as a function of generation

Posterior estimate for I->C 65-69 as a function of generation

Posterior estimate for I->C 70-74 as a function of generation

Posterior estimate for I->C 75-79 as a function of generation

Posterior estimate for I->C 80+ as a function of generation

Posterior estimate for H->R 0-4 as a function of generation

Posterior estimate for H->R 5-9 as a function of generation

Posterior estimate for H->R 10-14 as a function of generation

Posterior estimate for H->R 15-19 as a function of generation

Posterior estimate for H->R 20-24 as a function of generation

Posterior estimate for H->R 25-29 as a function of generation

Posterior estimate for H->R 30-34 as a function of generation

Posterior estimate for H->R 35-39 as a function of generation

Posterior estimate for H->R 40-44 as a function of generation

Posterior estimate for H->R 45-49 as a function of generation

Posterior estimate for H->R 50-54 as a function of generation

Posterior estimate for H->R 55-59 as a function of generation

Posterior estimate for H->R 60-64 as a function of generation

Posterior estimate for H->R 65-69 as a function of generation

Posterior estimate for H->R 70-74 as a function of generation

Posterior estimate for H->R 75-79 as a function of generation

Posterior estimate for H->R 80+ as a function of generation

Posterior estimate for H->D 0-4 as a function of generation

Posterior estimate for H->D 5-9 as a function of generation

Posterior estimate for H->D 10-14 as a function of generation

Posterior estimate for H->D 15-19 as a function of generation

Posterior estimate for H->D 20-24 as a function of generation

Posterior estimate for H->D 25-29 as a function of generation

Posterior estimate for H->D 30-34 as a function of generation

Posterior estimate for H->D 35-39 as a function of generation

Posterior estimate for H->D 40-44 as a function of generation

Posterior estimate for H->D 45-49 as a function of generation

Posterior estimate for H->D 50-54 as a function of generation

Posterior estimate for H->D 55-59 as a function of generation

Posterior estimate for H->D 60-64 as a function of generation

Posterior estimate for H->D 65-69 as a function of generation

Posterior estimate for H->D 70-74 as a function of generation

Posterior estimate for H->D 75-79 as a function of generation

Posterior estimate for H->D 80+ as a function of generation

Posterior estimate for R_0 as a function of generation

Posterior estimate for R_1 as a function of generation

Posterior estimate for R_2 as a function of generation

Posterior estimate for R_3 as a function of generation

Posterior estimate for R_4 as a function of generation

Posterior estimate for R_5 as a function of generation

Posterior estimate for R_6 as a function of generation

Posterior estimate for R_7 as a function of generation

Posterior estimate for R_8 as a function of generation

Posterior estimate for R_9 as a function of generation

Posterior estimate for R_{10} as a function of generation

Posterior estimate for R_{11} as a function of generation

Posterior estimate for R_{12} as a function of generation

Posterior estimate for R_{13} as a function of generation

Posterior estimate for R_{14} as a function of generation

Posterior estimate for R_{15} as a function of generation

Posterior estimate for R_{16} as a function of generation

Posterior estimate for R_{17} as a function of generation

Posterior estimate for R_{18} as a function of generation

Posterior estimate for R_{19} as a function of generation

Posterior estimate for R_{20} as a function of generation

Posterior estimate for R_{21} as a function of generation

Posterior estimate for R_{22} as a function of generation

Posterior estimate for R_{23} as a function of generation

Posterior estimate for R_{24} as a function of generation

Posterior estimate for R_{25} as a function of generation

Posterior estimate for R_{26} as a function of generation

Posterior estimate for R_{27} as a function of generation

Posterior estimate for R_{28} as a function of generation

Posterior estimate for R_{29} as a function of generation

Posterior estimate for R_{30} as a function of generation

Posterior estimate for R_{31} as a function of generation

Posterior estimate for R_{32} as a function of generation

Posterior estimate for R_{33} as a function of generation

Posterior estimate for R_{34} as a function of generation

Posterior estimate for R_{35} as a function of generation

Posterior estimate for Mixing factor 0-4 as a function of generation

Posterior estimate for Mixing factor 5-9 as a function of generation

Posterior estimate for Mixing factor 10-14 as a function of generation

Posterior estimate for Mixing factor 15-19 as a function of generation

Posterior estimate for Mixing factor 20-24 as a function of generation

Posterior estimate for Mixing factor 25-29 as a function of generation

Posterior estimate for Mixing factor 30-34 as a function of generation

Posterior estimate for Mixing factor 35-39 as a function of generation

Posterior estimate for Mixing factor 40-44 as a function of generation

Posterior estimate for Mixing factor 45-49 as a function of generation

Posterior estimate for Mixing factor 50-54 as a function of generation

Posterior estimate for Mixing factor 55-59 as a function of generation

Posterior estimate for Mixing factor 60-64 as a function of generation

Posterior estimate for Mixing factor 65-69 as a function of generation

Posterior estimate for Mixing factor 70-74 as a function of generation

Posterior estimate for Mixing factor 75-79 as a function of generation

Posterior estimate for Mixing factor 80+ as a function of generation

Posterior estimate for Mixing factor CH as a function of generation

Contribution to EF from different data sources

CPU time as a function of EF

Model evidence as a function of log(EF cut-off)
